DESCRIPTION

The lamp is made of aluminum and metal which is an important part of modern architecture. Aplomb uses this material in an innovative kind of way. Hang the lamp on its own or use several lamps as a composition at different heights.

Aptly named, the Aplomb Pendant ensures precise lighting, its aluminum shade pulling the cable taut, and lighting the room with a strong and handsome presence. The Aplomb Pendant is singularly industrial, using light to place a conventional material like aluminum+metal in an unconventionally elegant context.
