DESCRIPTION

The lamp is available in suspended and ceiling versions. "A ceiling fixture that places floating assemblies of large pebbles beneath a simple modern aluminium disc. These in turn reflect each other, bouncing light between the biomorphic surfaces they touch and their surroundings .

During the day the piece acts as a sculptural object reflecting the dynamics of natural light and the movement of people around them. Die-cast aluminum lighting units; reflective units made of injection-molded thermoplastic material with metallic finish; die-cast aluminum reflector.
